

Healthcare & Medical Facilities

Services and Solutions

Ameresco is your comprehensive cleantech solutions partner. We provide expertise, innovative engineering, and financial options that healthcare institutions and medical facilities need to reduce energy costs, increase resiliency, and address sustainability goals. We recommend energy systems that integrate with your existing equipment and prove state-of-the-art performance while making an impact on your carbon footprint.

Moreover, Ameresco delivers energy infrastructure upgrades without additional capital. New energy systems are more efficient, which means the budget currently allocated for utility payments can be used to replace or retrofit existing equipment. We can own, maintain and operate hospital energy generation systems, then sell back power and steam, freeing healthcare facilities from the costs and risks associated with energy generation. Ameresco is committed to quality and customer satisfaction, and delivering reliable and efficient energy now and for the future.

Ameresco's partnership with Sutter Health Santa Rosa advances sustainability initiatives with solar power to optimize energy usage and improve patient care. The 1.6 MW of solar offsets 40% of the hospital's overall electricity usage.

- **Infrastructure Upgrades & Conservation Measures**
- **Lighting & Water Retrofits**
- **Building Controls**
- **Energy Analytics and Supply Management**
- **Boilers, Chillers & HVAC Systems**
- **Renewable Energy, including Solar Power**
- **Microgrid & Battery Storage**
- **Cogeneration Plants**
- **Financial Options**
- **Capital-Asset Planning & Strategies**

Customer Benefits

We understand that reliability of energy is a top concern for healthcare facility management. Critical energy systems must be online and available 24 hours a day, even when the power grid is compromised. Healthcare energy solutions from Ameresco address the need for guaranteed energy delivery to critical power, heat, and water systems.

Modern infrastructure and renewable energy systems decrease energy cost uncertainty and increase energy security. On-site and distributed systems can be used for backup power independent of the power grid. Locally sourced renewables can bring the facilities closer to the power sources, minimizing transmission risk.

- **Additional Capital for Infrastructure Upgrades**
- **Resilient & Secure Energy**
- **Reduce Energy Consumption**
- **Utility Cost Savings and Certainty**
- **Sustainability-Focused Infrastructure**
- **Net Zero Carbon & ESG Strategies**
- **Meaningful Integration of Renewable Energy**
- **Capitalize on Clean Energy**

AMERESCO

by the Numbers

Delivered over **\$10 Billion** in Energy Solutions

70+ Offices Throughout the USA, Canada, and the UK and more than **1,000 Employees**

Developed over **300 MW** of Renewable Energy Projects

Up to **45% Energy Cost Savings** with Comprehensive, Audit-Based Improvements

Socially **Responsible** & Economically **Efficient**

In 2020, Ameresco's Renewable Energy Assets and Customer Projects Delivered a Carbon Offset Equivalent to **12.6 Million** Metric Tons of CO₂

Bringing Long-Term Value to Customers Since 2000

Founded in 2000, Ameresco, Inc. (NYSE:AMRC) is a leading cleantech integrator and renewable energy asset developer, owner and operator. Our comprehensive portfolio includes energy efficiency, infrastructure upgrades, asset sustainability and renewable energy solutions delivered to clients throughout North America and the United Kingdom.

Ameresco's Advanced Technology Portfolio Includes:

Energy Efficiency | Distributed Energy Generation, Storage & Microgrids | Infrastructure | Energy Analytics & Supply Management | Operations & Maintenance

Ameresco's sustainability services in support of clients' pursuit of net zero include upgrades to a facility's energy infrastructure and the development, construction, and operation of distributed energy resources. Ameresco has successfully completed energy saving, environmentally responsible projects with Federal, state and local governments, healthcare and educational institutions, housing authorities, and commercial and industrial customers. With its corporate headquarters in Framingham, MA, Ameresco has more than 1,000 employees providing local expertise in the United States, Canada, and the United Kingdom.

Ameresco's team of energy experts can assist you in identifying the solution that fits your needs.

For more information about Ameresco and our full-range of energy efficiency and renewable energy solutions, please call **1-866-AMERESCO** or visit **ameresco.com**.
